162 PROFERRED PLUMBING PRODUCTS

**The Legendary**  
*Rossite*  
**Granulated Drain Cleaner**

**Danger—Contains Caustic Soda!**  
This product is produced solely for use by professional plumbing contractors and specifically should not be used by unqualified consumers.  
Those who resell these products should be covered by their OWN product liability insurance.

**There is nothing like it! Rossite goes further and cleans drains better.**  
Will not crystallize.

**Rossite** is made from an exclusive and **PATENTED** formula that has been developed for the particular use of the plumbing trade. Plumbers prefer it because **Rossite** boils its way through obstinate stoppages with a Rapid Triple Action that does twice the work in half the time...and **without disagreeable odors.**

Scientific tests prove that **Rossite** is better!

Tests prove **Rossite** is the only product on the market that will, when activated, maintain a temperature of **200° or more**—for over 12 minutes! This is the real secret to **ROSSITE's** success.

**Rossite** is poured directly into the drain. Followed by a little water, it will open and clear stoppages caused by hair, lint, vegetable matter, grease, etc. Also very effective for thawing frozen drains, stacks and flush tanks. **Will not harm enamelware, pipes and connectors.**

Do not use in disposers or on aluminum. Always flush with cold water.

**SOLD IN QUANTITIES OF 12 ONE POUND CONTAINERS ONLY.**

**CLOSET BOWL & URINAL CLEANER**

REMOVES SCALE

The sure way to eliminate SCALE, LIME, RUST, SODIUM, MAGNESIUM, CALCIUM, SALTS, CONCRETE, PLASTER, or other water-bearing solids. DESTROYS ODORS.

STRIP, with RODINE 213, does not affect metals (except aluminum) and is harmless to vitreousware, pipes, and connections. Chrome plate and nickel WILL tarnish if not rinsed off immediately.

STRIP can be used full strength or diluted, depending on the cleaning application and the amount of deposit to be removed.

**For Urinals and Toilet Bowls:** Remove standing water. Pour about 12 ounces of STRIP into bowl and allow to stand 10 to 15 minutes. If stains and urinary deposits are also on the sides and under the flush rim, use a small hand mop or a rag wrapped around a toilet brush to clean the stained area. FLUSH THE BOWL SEVERAL TIMES.

**For General External Cleaning:** Place part or equipment to be cleaned in a glass, porcelain, crockery, or plastic container and cover completely with STRIP. Allow part to remain 15 minutes or until part is clean. In cleaning parts that are impractical to immerse, use a brush or mop to thoroughly apply STRIP until deposit or stain has been removed. WASH THOROUGHLY WITH WATER.

**For General Internal Cleaning:** For cleaning items such as hot water coils, unit heaters, etc., introduce STRIP through the appropriate opening. If this is not practical, a piece of pipe or tubing can be attached and filled with STRIP. When part is clean, DRAIN AND FLUSH WITH WATER.

**For Cleaning Brick and Tile:** Prepare a solution containing 1 part STRIP and 4 parts water. Use a brush dipped in the solution to scrub brick or tile facing. Wear goggles. USE RUBBER GLOVES and protect person and clothing. Do not apply to mortar. WASH THOROUGHLY WITH WATER.

OUR GUARANTEE—You must be satisfied.

FOR WEEKLY DRAIN LINE MAINTENANCE

**ROSSANE**  
LIQUID ALIVE BACTERIA WITH INSTANT ODOR CONTROL

ROSSANE is a suspension treatment consisting of specially developed bacteria, aerobic, anaerobic, and facultative in nature. The bacteria are harmless to animal and marine life and are non-pathogenic. **They eliminate the foul odors** and gases it produces. ROSSANE not only masks odors, it eliminates their causes. ROSSANE cannot rest in the presence of organic waste materials; it must process them. Once their job is done they immediately concentrate on building their colony population up to full strength. As soon as new waste comes into their presence they swing into action. Anywhere in your plumbing system (elbows, bends, joints and traps) where solid waste can accumulate ROSSANE can build a colony and eliminate the cause of sluggish drains and odor. ROSSANE can be sprayed on flat surfaces to eliminate organic odor in carpets, from urine, vomit, waste, etc.—or poured into ponds and lakes to control organic odor—safely.

**DIGESTS AND LIQUEFIES WASTE PLUS IMMEDIATE MALODOR NEUTRALIZATION**

ADVANTAGES

- Digests organic waste
- Non-toxic
- Eliminates strong odors
- Liquefies fats, proteins, carbohydrates & grease
- Harmless to marine & animal life

**ROOTROL**  
ROOT ELIMINATOR

12 PER CASE

ROOTROL is the wonder-working chemical for eliminating ROOT and FUNGUS growth. In most cases it gives complete satisfaction overnight. ROOTROL is another exclusive creation formulated only by us. It is harmless to the skin and clothing as it contains no caustic soda. ROOTROL is readily assimilated by ROOTS, which become paralyzed. After a short while decomposition takes place, causing the roots to slough away like rusty water. ROOTROL has a spreading action like oil on water and will coat the entire inside of pipe through which it flows, that way affecting growth entering from top or bottom of sewer line.

One can is usually sufficient for most jobs. 2 lb. can.

### ROSSILICONE SILICONE SPRAY

- Colorless, odorless, stainless, water repellent
- Deposits stick-free surface
- Heat-stable: -40°F to over 400°F
- Protects rubber parts
- Preserves rubber parts
- Safe for use around food products
- Accepted by U.S.D.A.
- This is a heat-stable, silicone aerosol that lubricates, protects, reduces friction and makes everything slide and glide more easily. It forms a slick, water-repellent non-adherent surface coating. It saves time, money, cleanup, causes less jamming and aids in the prevention of corrosion. It will not discolor or damage fabrics, metals, rubber or plastic surfaces.

# "Jet Swet"

**HEAVY-DUTY  
CARRYING CASE  
AVAILABLE  
HOLDS SIZES 1/2" TO 2"**

## Why use Jet Swet?

- Quick work on all full-port ball & gate valves & fittings
- Solder with water in lines
- Repair copper pipe
- Repair P.V.C. pipe
- Change M.I.P. or F.I.P. fittings
- Working pressure up to 60 PSI
- Available in sizes 1/2" thru 4"

**LUBRICATE  
TIGHTENING NUT  
AFTER EACH USE**

## Eliminates:

- Water Syphoning
- Main valve seeping water
- Bread clogging lines
- Freon to freeze the lines

The replacement for "plumbers bread". Finally the Plumber has a low cost and highly effective way to solve the age old problem of having to wait for the water to drain before he can solder.

THE Jet Swet tool eliminates the need to wait for the water to stop draining or siphoning before you can solder copper or glue PVC pipes. The tools insert through a valve or fitting to seal off the water so that they may be replaced, water free. When repairing pinholes in a water line, valves or unions can be installed to keep the water away from the repair. This new technique developed by a working master plumber makes repair and replacement work safe where there is a water siphoning danger. Works on most full port gate and ball valves. Also allows male and female fittings to be replaced or installed. Kit contains up to six sizes with carrying case. 1/2", 3/4", 1", 1-1/4", 1-1/2", 2".

## WATER TEST GAUGE

2-1/2" Gauge throttle plug  
0-300 PSI dial unbreakable face  
3/4" female hose connection

Regular pressure hand (shown at zero) pushes LAZY hand (shown at 275 lbs.) to peak operating or surge pressure point where it remains until you manually reset it.

Excellent to determine if P/T valve is leaking from failure or if leaking is caused by surge or excessive pressures. (Attach gauge to Boiler Drain Valve overnight.) LAZY hand operates over entire gauge range of 0-300 psi.

**LIME-LIFE  
ELEMENT**

Highest grade nickel and chromium.  
An ultra low-watt density element, the Lime-Life is designed to heat in lime and sand build-ups that will burn out ordinary elements.  
The Lime-Life also works best in areas where water has a high mineral content.  
Because of its sheath, the Lime-Life will even withstand dry-firing, one of the main reasons other elements fail.
