1/2" FEED WATER PRESSURE REGULATOR

- Size 1/2" (15mm)
- Maximum working pressure: 100 psi (6.9 bars)
- Maximum temperature: 212°F (100°C)
- Adjustment range:
10 - 25 psi (68.7 - 172.4 kPa) Set at 15 psi (103.4 kPa)

Series 1156F

NEW

- 44-250 Pressure Regulator **47.09**
44-253 Pressure Regulator - Solder Union **55.98**

3/4" FEED WATER PRESSURE REGULATOR

- Size 3/4" (20mm)
- Tight seating check valve with integral strainer and unitized design for simplified servicing
- Set at 15 psi (103.4 kPa)
- Maximum working pressure: 100 psi (6.9 bars)
- Maximum temperature: 212°F (100°C)

Series N256

NEW

- 44-254 3/4" Bronze Body Feed Water Pressure Regulator **99.56**

SERVICE CHECK VALVES

- Spring loaded valve opens to system pressure
- Not to be used on safety relief valves.
- System pressure must be reduced prior to removing system components

Series SCV

NEW

- 43-290 1/8" Service Check Valve **6.54**
43-291 1/4" Service Check Valve **10.90**

BRONZE SILENT CHECK VALVE

- PTFE seats and brass disc
- Install in a horizontal or vertical position
- Stainless steel guide rod and spring
- Silent check operation
- Prevents water hammer

Series 600

NEW

- 43-295 1/2" Silent Check Valve **14.82**
43-296 3/4" Silent Check Valve **19.60**

A.S.M.E. WATER PRESSURE SAFETY RELIEF VALVE

- Size 3/4" (20mm)
- Bronze body
- Standard setting 30 psi
- Safety relief valve for pressure protection only of hot water heating boiler equipment

Series 174A

NEW

- 44-231 3/4" 174A Boiler Relief Valve **94.22**

IRON BODY SAFETY RELIEF VALVE

- Size 3/4" (20mm)
- Iron body
- Standard setting 30 psi
- Expanded outlets for hot water space heating boilers
- Seat located above drain, water can't be trapped and sediment can't foul seat
- Non-mechanical seat-to-disc alignment
- Water seal of high temperature resisting material isolates spring working parts from water during relief

Series 740

NEW

- 44-232 3/4" 740 Boiler Relief Valve **102.44**

JG John Guest®

HOW TO MAKE A CONNECTION

Fittings and pipe should be kept clean, bagged, and undamaged before use.

TWIST AND LOCK FITTINGS

The fitting should be in the 'unlocked' position. This is shown by a small gap between the screw-cap and the body flange.

Push the pipe into the fitting and up to the pipe stop.

Twist the screw-cap until it touches the body flange. This locks the pipe into position and increases the O-ring seal around the pipe.

Pull to check that it is secure. It is good practice to test the system prior to leaving the site or before use. Our recommended test procedure is shown in our Technical Checklist.

TO DISCONNECT:

Ensure that the system is depressurized.

Be sure to twist the screw-cap back to the unlock position.

Push the collet square against the face of the fitting by using fingers. With the collet held in this position the pipe can be removed. The fitting can be used again without the need for replacement parts. (Ensure the fitting is clean before every use).

The Brands "Speedfit" and "John Guest" are the registered trademarks of John Guest International Limited.

SHARKBITE™ FITTINGS

**VALVES,
FITTINGS, AND
PIPE REPAIR**

THE SHARKBITE™ CONNECTION SYSTEM

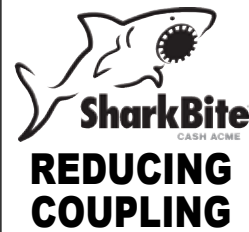

- SHARKBITE™ Features and Benefits
- Instant push-fit connection for increased ease of use: no soldering required!
- Fittings certified to 200 PSI and 180o F (82o C): proven durability and quality!
- Fits OD controlled copper, CPVC or PEX pipe: versatility with all accepted types of pipe!
- Design certified and agency listed: inspector friendly, peace of mind!
- Compact, robust bronze body: foundation of a strong, durable fitting!
- Design certified to NSF-61 product standard for use in potable water system: quality engineered and manufactured!
- No loose components: integrated design!

• INSTALLATION: 4 EASY STEPS

- STEP ONE: Cut Pipe
- STEP TWO: Deburr pipe
- STEP THREE: Mark pipe
- STEP FOUR: Install pipe to proper depth
• (listen for positive "click")

PERMALYNX FITTINGS

**VALVES,
FITTINGS, AND
PIPE REPAIR**

Introducing **Permalynx**, a newly-engineered mechanical joining system. It's the fastest copper joining system on earth. Just push and twist to connect copper tube by hand. No flame, no tools required.

Speed to Meet Tight Schedules

Permalynx speed cuts the calendar days needed to finish a job. It gets crews off the job fast and offers a leg up on schedule-crunched projects. At more than 60% faster than sweat, PermaLynx will help get clients into their building in record time - and avoid costly delays.

PRESS FITTINGS

50-YEAR GUARANTEE

PRESS FITTINGS provide a simple, clean and efficient joining method that leaves others in the dust. No more torch, adhesives or fluxes. A specially engineered O'Ring and press fit tool work together to form a watertight seal. Simply applying pressure from the press-fit tool tightens the O'Ring onto the tube, ensuring a perfect fit every time.

Press Fittings from Hodes Co. work with Elkhart or RIDGID pressing tools and jaws.

PEX TUBE & FITTINGS

Perfect Pex™

Pex is a state-of-the-art plumbing system that utilizes a new plastic tubing material, cross-linked polyethylene. It can be used for hot and cold potable water and is listed by NSF as safe. It also meets or exceeds the requirements of ASTM F876 and F877.

IMPORTANT

Pex components (insert fittings, crimp rings and tube) **are not interchangeable** with polybutylene or any other insert and crimp components even though they have been designed for use with the same crimp tools and gauges.

Some advantages over other

commonly used plastic plumbing systems:

- Superior temperature tolerance
- Corrosion resistant
- Cost effective installation
- Greater flexibility
- Proven reliability
- Competitive pricing
- Can be used with Qest Qicktite fittings
- Fits Pex cross-linked polyethylene tubing
- Pex fittings are NOT interchangeable with current polybutylene pipe insert fittings and crimp rings
- Fitting contains 3 bars

COUPLING BRASS BARB x BARB

- Fits Pex cross-linked polyethylene tubing
- Pex fittings NOT interchangeable with current polybutylene pipe insert fittings and crimp rings
- Fitting contains 3 bars

PEX TUBE & FITTINGS

**VALVES,
FITTINGS, AND
PIPE REPAIR**

Perfect Pex™

Pex is a state-of-the-art plumbing system that utilizes a new plastic tubing material, cross-linked polyethylene. It can be used for hot and cold potable water and is listed by NSF as safe. It also meets or exceeds the requirements of ASTM F876 and F877.

IMPORTANT

Pex components (insert fittings, crimp rings and tube) **are not interchangeable** with polybutylene or any other insert and crimp components even though they have been designed for use with the same crimp tools and gauges.

Some advantages over other

commonly used plastic plumbing systems:

- Superior temperature tolerance
- Corrosion resistant
- Cost effective installation
- Greater flexibility
- Proven reliability
- Competitive pricing
- Can be used with Qest Quicktite fittings
- Fits Pex cross-linked polyethylene tubing
- Pex fittings are NOT interchangeable with current polybutylene pipe insert fittings and crimp rings
- Fitting contains 3 barbs

MALE ADAPTER BRASS BARB x MALE SWEAT

- Fits Pex cross-linked polyethylene tubing
- Pex fittings NOT interchangeable with current polybutylene pipe insert fittings and crimp rings

FITTINGS, AND
PIPE REPAIR**

AIR CHAMBERS

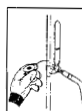

**MINI-RESTER™
WATER HAMMER
ARRESTER
HOSE TEE**

- 4" long
- Can be installed at any angle
- Engineered especially for single fixture residential and commercial installations
- Absorbs water hammer caused by quick-closing valves in washing machines, sinks, tub/showers, toilets, icemakers and dishwashers
- Always remember to install mini-resters on both the hot and cold lines to a plumbing fixture causing water hammer
- Designed especially for in-line use with washing machines
- Lifetime warranty

12 PER BOX
71-530 3/4" M Hose x 3/4" F Hose **21.23**

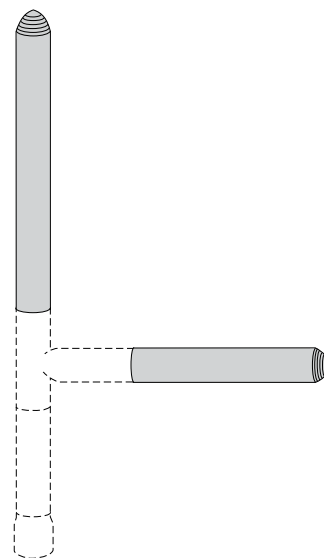

**MINI-RESTER
WATER HAMMER
ARRESTER**

- Installs into any 1/2" female sweat fitting
- Use 95/5 lead-free solder when installing
- Heat female portion of fitting (as shown below)
- Do not braze—do not overheat

12 PER BOX
71-534 1/2" Male Sweat **15.35**

AIR CHAMBER

- Preformed copper spun closed
- Straight pattern
- Used as stub-out
- Cut off end after test

TYPE L		100 PER BOX	
71-510	1/2" x 6"	2.35
71-511	1/2" x 8"	2.93

MISSION SHIELDED TRANSITION COUPLING

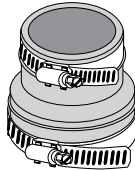

- Band-Seal Couplings are a specially designed coupling for making transitions between different types of pipe. The advantages of these couplings are:
- An exact sized coupling to join Cast Iron, ABS/PVC, Steel and Copper
- Makes transitions between different types of pipe easy and economical
- Conveniently labeled for easy identification of application and sizing
- Neoprene inner sleeve with a heavy 300 Series Stainless Steel Shield
- Shield provides additional support to the joint as well as protection
- Code approved by UPC, B.O.C.A., Southern Building Codes and Canadian Standards Association
- Many code agencies require a shielded coupling to be used for transitioning above ground agencies will not allow a flexible coupling for above ground use
- Over 30 years of proven performance

EXPANDABLE DOLLAR PLUG

The design of the "Gripper"™ uses the mechanical advantage of the inclined planes on the end plates and o-ring. When pressure is applied to the end plates by tightening the wing nut – the o-ring is effortlessly expanded by moving along the inclined surfaces of the plastic end plates – YOU CAN ACTUALLY FEEL THE SMOOTH, EASY MOVEMENT TAKING PLACE!

pipe-tytes inc. U.S. PATENT #419477

METAL STUD INSULATORS

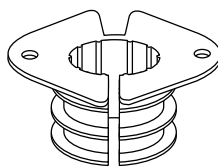

Protects copper & polybutylene tubing from sharp edges of metal studs. Eliminates pipe rattle & electrolysis by completely isolating the pipe from the metal stud. Fits all 1/2", 3/4", & 1" copper or poly pipe tubing. For use on all metal studs 18 gauge or lighter. Installs in seconds for a neat professional job. Patented offset hole makes for better pipe alignment. Made of tough durable polymer (plastic). Withstands temperatures of 212° Fahrenheit.

SOLD 100 PER PACKAGE ONLY
