

How Minimal Inventory Management Drives Maximum Shop Profitability

Carney Plumbing Heating & Cooling in Hatfield, Pa., has created a model of efficiency for service delivery and inventory management by embracing inventory best practices, adopting inventory automation, and maintaining consistent inventory discipline. A key element is Hodes Co.'s Stock Service System which empowers inventory excellence and operational productivity, allowing Carney techs to stay in the field 90 percent of the time, keeping them more focused on customer calls, projects – and billings.

As plumbing service manager at Carney Plumbing Heating & Cooling, Bob Blessing has one very important goal: to support his techs in the field and keep them focused, happy and productive.

The reasons are simple. Happy techs create lifetime customers. Focused techs do better work. And productive techs earn more profits.

“Being a tech is hard work, I’ve done it, so I’m constantly looking for ways to make their lives easier and keep them doing what they enjoy most which is being in the field, working with customers, and fixing problems,” Blessing said.

Blessing strives to bring organization, automation, and redundancy to every part of service operations. As a long-time user of the Stock Service System from Hodes Co., Blessing has firsthand experience with the long-term benefits of inventory automation.

“Our inventory automation is a big driver of productivity. We can get our guys in the field faster, and keep them in the field longer, which lets us make more service calls and earn more revenue per tech.”

- **Bob Blessing**
Plumbing Service Manager,
Carney Plumbing Heating & Cooling

Bob Blessing
Plumbing Service Manager
Carney Plumbing Heating & Cooling

“The Stock Service System checks all the right boxes of speed, visibility, and productivity,” Blessing said. “Our parts are easy to find, anyone in the shop can do it, and we get more done. It’s an easy concept but very hard to achieve unless you have an automated inventory system and a solid partner like Hodes Co.”

Speed as a Competitive Advantage

Speed is a defining characteristic of any leader in any industry, and Blessing said inventory automation has added speed in several areas of operations and service delivery at Carney.

“An organized and automated shop saves time, which is the same as money in our business,” Blessing said. “And the time saved in ordering,

PAINS & GAINS

Pains

- Carney Plumbing strives to provide comprehensive support to its techs in the field.
- Manual inventory management required too much time and distraction.
- Job-sharing and cross-training were difficult with inventory variation.

Gains

- Hodes Co.'s Stock Service System allows anyone in the shop to help out with storage, picking and truck replenishment.
- Techs stay focused and in the field longer, driving higher top-line revenues per tech.
- The enhanced speed, visibility, and productivity give Carney a competitive advantage and enable the company to handle more calls and help more customers – with the same number of techs and support staff.

stocking, and storing allows more time for marketing, selling, servicing, and customer care.”

Automating inventory management also makes time for other higher value activities that can't be automated like coaching, training, and customer relationship-building.

The Stock Service System checks all the right boxes of speed, visibility, and productivity. Our parts are easy to find, anyone in the shop can do it, and we get more done. It's an easy concept but very hard to achieve unless you have an automated inventory system and a solid partner like Hodes Co.

Bob Blessing, Carney Plumbing Heating & Cooling

Visibility for All

Collaboration, job-sharing, and teamwork are key qualities of the culture at Carney and inventory automation enables those qualities.

“The Stock Service System makes it easier for us to cover positions because anyone can find anything in the shop,” Blessing said. “It makes inventory clear and consistent, and the right part gets picked every time because it's always in the right place.”

A well-organized shop yields other benefits, too, including safety, security, and lower stress levels.

Productivity Drives Profits

The classic definition of productivity is doing more with the same which means that a company with automation and higher productivity can produce more goods, services – and revenues – with the same amount of relative work.

“Our inventory automation is a big driver of productivity,” Blessing said. “We can get our guys in the field faster, and keep them in the field longer, which lets us make more service calls and earn more revenue per tech.”

Blessing said his techs rarely return to the warehouse or stop at other supply houses for spare parts. Inventory levels are set and monitored. Pick lists for each truck are generated and fulfilled daily. And restocking is a smooth and accurate process with Hodes Co.'s bins, barcodes, and reordering software.

“Hodes Co.'s Stock Service System has definitely cultivated a productivity mindset throughout our company,” Blessing said. “It frees us up for more important tasks, keeps our techs happy and focused, and allows us to serve more customers and drive top-line growth. We couldn't imagine running our shop without it.”

Joe Hodes is the president of Hodes Co. and consults with plumbing shop owners across the country on inventory management and optimization. You can reach him by email at Joe@HodesCo.com or by phone at 816.914.5858.

**MAGNUM™
HEAVY PATTERN
MACHINE BRASS ROD
SLIP JOINT NUTS
WITH LEAK-FREE
PREMIUM WASHER**

Our nut is machined from brass rod stock, not cast. There are never any casting irregularities. The six large sides give your wrench a no slip surface with a much heavier, better chrome plating than die cast or cast brass. Buffed to a "clean" shine, this superior slip joint nut is another quality product of Hodesco.

Nuts packed 12 sets per heavy corrugated box and slip joint washers are included **SOLD 12 PER BOX ONLY**

Item #	Description	Price 1	Price 2
51-627	1-1/4" Chrome Plated Slip Nut	4.49	3.95
51-631	1-1/2" Chrome Plated Slip Nut	4.49	3.95

**PREMIUM LEAK-FREE POLYMER RUBBER
BEVELED SLIP JOINT WASHERS**

- Has a better flex fatigue resistance than traditional rubber washers to hold its shape longer
 - Offers improved resistance to oil, chemicals and water
 - Vibration resistant
 - Resistant versus sulfuric acid & sulfuric chloramine
- SOLD 25 PER PACKAGE ONLY**

HANDI LAV-GUARD
INSULATION KIT

FINALLY, A COSMETICALLY APPEALING, DURABLE, HANDICAP LAVATORY INSULATION SYSTEM.

To satisfy current Federal mandated barrier-free and accessibility requirements, BOCA, ANSI and many state codes require that insulation must be applied over the hot water supply and waste piping under lavatories accessed by people with disabilities. These codes protect wheelchair users from being burned or sustaining injury from impact.

The Problem:

Until now, unsightly black extruded foam insulation with its poor fit and inadequate means of securing has been, for lack of a better product, the usual specification of architects and mechanical engineers. Even the most experienced insulator or plumber becomes frustrated with its time-consuming application and poor appearance.

The Solution:

The Handi Lav-Guard kit is a unique, fully molded, flexible vinyl insulation system which cushions impact and is an excellent insulator against burns. Its neutral white color blends nicely into the scheme of any restroom. The Handi Lav-Guard kit is an attractive, durable insulation system that meets virtually all building codes and aesthetic standards.

- Fast-installing antimicrobial molded undersink safety covers for ADA accessibility compliance
- Built in fasteners are quick, strong, and reusable
- Tear-to-fit trimming feature eliminates the need for tools

Never compromise quality when dealing with plumbing.

FLOW MASTER has not used "plastic nuts" for over 10 years.

Brass nuts are much harder to strip so the chances of a good tight seal are improved.

FLOW MASTER 3 ring "ACCU-CRIMP" has 3 seal bands to keep a tight water seal. Many competitor's crimps offer "water channels" with crimp ridges running parallel to the hose.

Fluidmaster
Made in China,
5-year warranty

Homewerks Worldwide

FLOW MASTER
Made in the USA,
5-year warranty

	Barb Length	Sleeve Length	Difference	Percent Less Sealing Surface
Flow Master	1.28	.772	.508	
Homewerks	1.057	.738	.319	37.20
Fluidmaster	.978	.72	.258	49.21
Brasscraft	.852	.663	.189	62.80

Up to 44% longer barb and sleeve offers more contact area for a better seal of the ferrule and crimp

More surface area = more sealing area
